Graduate Study in Chemistry and Biochemistry at UIC

Hear about faculty research.
Find out about financial support (no more loans!).
Have lunch with graduate students.
Attend a poster session.
Tour research facilities.

The Department of Chemistry at UIC offers Ph.D. programs in organic synthesis, analytical technique development, surface and material science, biophysical and bioanalytical chemistry, molecular, biology, and protein structure and function to prepare students for a broad range of careers in academia, chemical, pharmaceutical, and biotechnology industries.
